Technovision 2026-27

Technical Club “FLUX”

Rulebook for RoboRumble:

Participation rules:

1. Team size should not exceed 4 members. Individual registrations are also allowed.
2. All members in a team should be enrolled in the same institution.

Competition setup:

1. The participants are required to construct a bot capable of completing the track in the allotted time.
2. The track will consist of many hurdles which the participants must overcome/complete.
3. Score will be calculated on completion of the track. Finishing the track is mandatory.

Competition rules:

1. No person can join more than one team .
2. The winners will be decided on basis of highest score and minimum time.
3. Every team will be allowed one run only.
4. A team may restart from the previous checkpoint at any point in the run.
5. After failing to complete an obstacle 4 times, the current obstacle will be skipped, and add 20 second time penalty will be added.
6. After usage of technical timeout, the run will continue from the last checkpoint.
7. Each participant will be allowed to skip one obstacle.

Bot rules:

1. Weight of the bot should not exceed 3 Kilograms.
2. The bot must be able to fit within a Hidden equation volume. An error of up to Hidden equation for each dimension will be tolerated.
3. Voltage difference between no two points in the bot should be greater than 12 V.
4. Intentionally damage to the track will be grounds for disqualification.

Marking rules:

1. Taking a timeout will incur a Hidden equation-second addition to the total time taken.
2. The final score will be the calculated with the following formula:

Total Score = (540 – TU – (MNP*3) - (MJP*15))

1. TU = Time Used
2. MNP = Minor Penalties
3. MJP = Major Penalties

Venue rules:

1. It is expected of participants to maintain the decorum of the venue.
2. Violent outbreaks, non-professional behavior towards other parties will be cause for disqualification and removal from the venue.
