TECHNICAL CLUB FLUX • SATI VIDISHA

TECHNOVISION 2026

MODEL PRESENTATION

OFFICIAL EVENT RULEBOOK

Eligibility • Project Standards • Presentation • Venue Conduct

This rulebook outlines the participation requirements, project standards, presentation procedure, and conduct expected from all teams participating in the Model Presentation event under Technovision, organized by Technical Club FLUX at SATI Vidisha. All participants are expected to read and follow these rules.

1. PARTICIPATION RULES

1. Students from schools and colleges are eligible to participate.

2. Each team must consist of a minimum of **2 members** and a maximum of **4 members**.

2. PROJECT REQUIREMENTS

1. The project must be either a **hardware-based working model** or a **science-based project**.

2. The project must be safe to operate and must demonstrate a valid technical or scientific concept.

3. The project must be original. Copied projects or commercially available, ready-made projects may lead to disqualification.

4. The use of dangerous materials, hazardous chemicals, explosives, or high-risk components is strictly prohibited.

3. PRESENTATION GUIDELINES

1. Each team will be allotted a maximum of **10 minutes** for the model presentation, explanation, and demonstration.

2. Teams must report to the venue at least **30 minutes before** their allotted presentation time.

3. Late arrival may result in disqualification or reduced evaluation time, at the discretion of the organizers.

4. Teams must bring all materials, power supplies, and accessories required to set up and demonstrate their models.

4. VENUE RULES & DISCIPLINE

1. Participants are expected to maintain proper decorum, discipline, and cleanliness at the venue.

2. Violent behavior or unprofessional conduct toward organizers or other participants will result in immediate disqualification and removal from the venue.

3. The organizing committee reserves the right to modify the event schedule or structure if required.

IMPORTANT

By participating in Model Presentation, each team agrees to comply with the rules stated in this rulebook and follow instructions issued by the organizing committee.

Technovision 2026-27

Technical Club "FLUX"

Official Rulebook: RoboWalk

Team Composition & Eligibility Rules

1. Team Size: A team may consist of a minimum of 2 member and a maximum of 4 members.
2. Institution Rules: All members of a team must be enrolled students of the same l institution.
3. Single Entry: No participant can be a member of more than one team in this competition.

Bot Specifications (No Circular Wheels Allowed)

1. The bot must not use standard circular wheels, rollers.
2. Any mechanism relying on rolling continuous wheel surfaces for primary motion will result in immediate disqualification.
3. Allowed mechanisms: You can use legs, mechanical joints that walk like legs, or crawling and stepping feet to move your robot.

Dimensions & Volume:

1. The bot must fit within a maximum bounding box of 30 cm × 30 cm × 30 cm at the start of the race.
2. A tolerance of up to 5% on each dimension is allowed.

Weight Limit:

1. The total weight of the bot (including power supply/batteries) must not exceed 3.0 kg.
2. The potential difference (voltage) between any two points on the robot must not exceed 12 V DC.

Control Mechanism:

1. The bot may be **wired** or **wireless** (RF, Bluetooth, or autonomous).
2. For wired bots, Keep the wire loose at all times. Pulling or dragging the robot with the wire will result in a penalty.

Track Specifications & Race Setup

1. The race track consists of a designated lane with a Start Line, Checkpoints, and a Finish Line.

2. The terrain may feature varying surfaces (e.g., smooth acrylic/wood, mild rubber mats, low-profile speed bumps, or slight inclines).
3. Finishing the track from Start to Finish is mandatory to qualify for ranking.

Competition & Track Rules

1. **Restart & Checkpoints:**
    - If your robot flips, gets stuck, or breaks down, you can restart from the last cleared checkpoint.
    - A manual intervention to reset the bot will incur a time penalty.
2. **Technical Timeout:**
    - Each team is allowed **one technical timeout** of up to **2 minutes** for quick repairs or battery replacements during their run.
    - Taking a technical timeout incurs a **10-second penalty** added to the final time.
    - After the timeout, the run resumes from the last cleared checkpoint.

Marking Scheme & Scoring

Winners will be determined based on the Highest Final Score (or Lowest Effective Time).

A. Final Score Formula

$$\text{Total Score} = 600 - \text{TU} - (\text{MNP} \times 5) - (\text{MJP} \times 20)$$

$$\text{Total Score} = 600 - \text{TU} - (\text{MNP} \times 5) - (\text{MJP} \times 20)$$

Where:

- TU**(Time Used):** Total elapsed time taken to clear the track in seconds.
- MNP**(Minor Penalties):** Count of minor infractions (e.g., touching track walls, line step-out, wire pulling).
- MJP**(Major Penalties):** Count of major infractions (e.g., manual resets, technical timeouts, track resets).

Venue Rules & Conduct

1. **Decorum:** All participants are expected to maintain professionalism and sportsmanship at all times within the venue.
2. **Disqualification Grounds:**

- Any violent behavior, ungentlemanly conduct, or abusive language toward judges, volunteers, or opponent teams will lead to **immediate disqualification and removal from the venue**.
- Intentional damage to the competition track, timing equipment, or venue property will result in disqualification and potential financial penalties.

3. **Judges' Authority:** The decision of the track judges and event coordinators is final and binding in all circumstances.

Technovision 2026-27

Technical Club "FLUX"

Rulebook for RoboRumble:

Participation rules:

1. Team size should not exceed 4 members. Individual registrations are also allowed.
2. All members in a team should be enrolled in the same institution.

Competition setup:

1. The participants are required to construct a bot capable of completing the track in the allotted time.
2. The track will consist of many hurdles which the participants must overcome/complete.
3. Score will be calculated on completion of the track. Finishing the track is mandatory.

Competition rules:

1. No person can join more than one team .
2. The winners will be decided on basis of highest score and minimum time.
3. Every team will be allowed one run only.
4. A team may restart from the previous checkpoint at any point in the run.
5. After failing to complete an obstacle 4 times, the current obstacle will be skipped, and add 20 second time penalty will be added.
6. After usage of technical timeout, the run will continue from the last checkpoint.
7. Each participant will be allowed to skip one obstacle.

Bot rules:

1. Weight of the bot should not exceed 3 Kilograms.
2. The bot must be able to fit within a 30 cm × 30 cm × 30 cm volume. An error of up to 5% for each dimension will be tolerated.
3. Voltage difference between no two points in the bot should be greater than 12 V.
4. Intentionally damage to the track will be grounds for disqualification.

Marking rules:

1. Taking a timeout will incur a 10-second addition to the total time taken.
2. The final score will be the calculated with the following formula:

Total Score = (540 – TU – (MNP*3) - (MJP*15))

1. TU = Time Used
2. MNP = Minor Penalties
3. MJP = Major Penalties

Venue rules:

1. It is expected of participants to maintain the decorum of the venue.
2. Violent outbreaks, non-professional behavior towards other parties will be cause for disqualification and removal from the venue.
